

Jeevana Gudala

Full Stack Engineer

Lewisville, TX | +1 (940) 758-1050 | Email | [LinkedIn](#)

SUMMARY

Full Stack Engineer with **5+ years of experience** building **enterprise, FinTech, and AI-enabled applications** across **IBM and Thoughtworks**. Progressed from core software engineering into full-stack development, distributed systems, cloud-native delivery, and production AI workflows. Brings hands-on expertise in **React, TypeScript, Python, FastAPI, Java, RAG, and Agentic AI**, combined with strong ownership, problem solving, and cross-functional collaboration to deliver secure, scalable applications.

SKILLS

Programming & Full Stack: Python, TypeScript, Java, JavaScript, React, Next.js, FastAPI, Spring Boot, Pydantic

APIs & Architecture: REST APIs, Microservices, Kafka, Event-Driven Architecture, Workflow Automation

AI & RAG: LLMs, LangGraph, LangChain, RAG, MCP, Tool Calling, Structured Outputs, HITL

Search & Retrieval: Vector Search, BM25, Reranking, Knowledge Search, IBM Watson Discovery

ML & NLP: Scikit-learn, Watson NLU, IBM Watson Assistant, NLP Classification, Intent Detection, Entity Extraction

AI Evaluation: Golden Datasets, RAGAS, LLM-as-a-Judge, Precision, Recall, F1 Score

Data & Databases: PostgreSQL, MySQL, IBM Db2, SQL, Redis

Cloud, DevOps & Observability: AWS (ECS, S3), Docker, Kubernetes, OpenShift, GitHub Actions, Jenkins, CI/CD, OpenTelemetry

Security & Governance: OAuth2, JWT, RBAC, Authentication, Authorization, Audit Controls

Testing & Delivery: JUnit, Mockito, Postman, Unit Testing, Integration Testing, Regression Testing, Agile/Scrum, Code Reviews

EXPERIENCE

Full Stack Engineer – Thoughtworks

May 2025 – Present | Remote, USA

- Deliver client-facing **FinTech** case and support workflows using **React, TypeScript, Next.js, Python, and FastAPI**, implementing 6+ production endpoints through **REST APIs** for disputes, approvals, and dashboards.
- Engineer **Event-Driven Architecture** with **Apache Kafka, PostgreSQL, and Redis**, coordinating payment, escalation, and resolution states across distributed services for reliable asynchronous workflow execution.
- Safeguard customer and operational workflows with **OAuth2, RBAC, Pydantic Validation, and Audit Controls**, partnering with **Risk and Product** to enforce permission-aware financial operations.
- Embed **LangGraph, LangChain, RAG, Vector Search, BM25, Reranking, Tool Calling, and MCP** into support workflows, improving retrieval precision by 8% while retaining **Human-in-the-Loop** approvals.
- Benchmark AI responses with **Golden Datasets, RAGAS, LLM-as-a-Judge, Precision, Recall, and F1**, partnering with **QA** to validate grounded outputs before production releases.
- Operate secure cloud-native services on **AWS** using **Docker, Kubernetes, GitHub Actions, OpenTelemetry, and CI/CD**, maintaining 70%+ test coverage while tracing API and workflow failures.

Software Engineer – IBM

Apr 2021 – Dec 2023 | India

- Built **Incident Management** features using **React, Java, Spring Boot, REST APIs, and Microservices**, delivering 8+ endpoints for ticket intake, assignment, escalation, resolution, and operational dashboards.
- Orchestrated **Event-Driven** workflows with **IBM Event Streams, Apache Kafka, IBM Db2, SQL, and Redis**, enabling asynchronous updates, consistent state propagation, and traceable processing across support operations.
- Applied **IBM Watson Assistant, Watson NLU, Python, and scikit-learn** to classify service requests, reaching 80% **F1 Score** and improving category and priority recommendations for support teams.
- Created **Knowledge Search** workflows with **IBM Watson Discovery, Intent Detection, and Entity Extraction**, surfacing relevant troubleshooting content and improving guided resolution for recurring support cases.
- Fortified distributed services using **JWT, OAuth2, RBAC, Authentication, and Authorization**, separating support and administrative permissions while protecting incident and knowledge workflows across user groups.
- Optimized testing and delivery with **JUnit, Mockito, Postman, Git, Jenkins, Docker, and Red Hat OpenShift**, reaching 75% test coverage while collaborating with **QA** during **Agile/Scrum CI/CD** releases.

Software Engineer Intern – IBM

Apr 2020 – Mar 2021 | India

- Developed request and approval modules for a centralized **Workflow Automation** platform using **React, JavaScript, Java, Spring Boot, and REST APIs**, delivering 6+ endpoints for structured request tracking.
- Implemented **IBM Db2 and SQL** data structures with **JWT and RBAC**, enforcing **Authorization** across 4 user roles while improving **Request Traceability and Approval Consistency**.
- Validated backend services and workflow scenarios through **JUnit, Postman, Unit Testing, and Integration Testing**, achieving 55% coverage and strengthening **Regression Testing** confidence across core functions.
- Integrated application changes with **Git, Jenkins, Docker, Red Hat OpenShift, and CI/CD**, participating in **Code Reviews** and deployment checks within 2-week **Agile/Scrum** sprints, supporting consistent releases.

EDUCATION & CERTIFICATION

Master of Science, Advanced Data Analytics

Jan 2024 – Dec 2025 | USA

University of North Texas, Denton, TX

- [AWS Certified Solutions Architect – Associate](#)
